

Facts Disclosed by the CPS in 2007

An area of concern includes Smith's alleged involvement in the disposal or attempted disposal of the car used in the murder of Robert Magill. Previously withheld evidence informed the police that Smith was instrumental in relation to the disposal of the said BMW car.

Smith said that he did not have any connection with the BMW.

Police evidence confirms them to believe Smith's association with the BMW car is a fact.

A statement made by the police (and now disclosed) during the investigation states that Smith was **specifically** involved.

Police evidence now confirms the police were in possession of evidence connecting Smith to the car and that he had been named and described as well as where he lived, down to the vehicle he drove and what he did for a living. Witness material previously not disclosed to Kevin's defence team until 2007 names Smith and Vincent with being involved.
